Continuation of 11. does NOT place the application in condition for allowance because: The proposed amednment to claim 30 overcomes the objection to claim 30. The proposed amendments to claims 15, 17 and 20 correct grammatical/formal matters not identified in the previous Office action, but nevertheless do not affect the scope of the claims. These amendments will be entered upon appeal. The remainder of Applicant's reply is merely argument and the arguments are not persuassive. Applicant argues that examiner's interpretation of some claim language, previously identified as indefinite, is not correct and offers narrow definitions/interpretations of various limitations. However Applicant does not attempt to narrow the claim language by amendment nor identify support in the specification for Applicant's narrow interpretation of various claim limitatinos. For example see page 12 of Applicant's remarks reproduced below:

"In addition, "associating an accepting communication terminal of said one or more communication terminals with said promotion message, on reception of said acceptance signal from said accepting communication terminal," as recited in claim 1, is not the same as associating and advertisement with the information determined. What is described in claim 1 requires registration, not just mere association."

This is an example of Applicant reading limitations into the claim that are not there. Association means association. Applicant fails to show where association is redefined to mean narrowly/additionally "registration." For at least this reason the arguments do not place the application in condition for allowance.
